Excavator

JOHN DEERE

THE FAST TRACK LOOKS GREAT FROM HERE

With powerful digging forces, swing torque, and lift capacities optimized to make the most of every gallon of fuel, our reimagined 250 P-Tier Excavator can help fast-track your bottom line. Enhancements inspired by ideas from real-world customers include Powerwise Plus™ technology that boosts performance on demand, intuitive operating controls, and reliably rugged undercarriage components. Optional camera array with LED-surround lighting plus deluxe LED lights help you see your work like never before. This mid-size muscle was designed to take your operation through the challenges — and accelerate your expectations.

FEATURES

Seeing is believing

Optional camera array with LED-surround lighting integrated into the main monitor work together to supplement 270-degree visibility of the area around the machine.

Plan for productivity

Powerwise Plus hydraulic-management system balances engine performance and hydraulic flow for reliable operation. **High productivity** yields more power and faster hydraulic response to move more material. **Power** delivers smooth, balanced metering for normal operation. **Economy** reduces engine rpm and helps save fuel.

Underneath it all

New integrated idler and adjuster on the undercarriage of the 250 P-Tier Excavator eases the greasing process. Strengthened idler bearing absorbs the brunt of whatever the track frame encounters, to boost overall wear.

Designed to deliver long life

Improved front-joint durability including new bushings on the boom end and foot, better front-piping clamping, and strengthened undercarriage components compared to earlier models help extend uptime and wear life. Larger front-piping diameter and new electric cooling fans improve fuel efficiency by up to five percent.

Control you can count on

Ergonomically correct short-throw pilot joysticks enable smooth, precise fingertip control with less movement or effort. Push buttons in the right lever allow predictable control of auxiliary hydraulic flow for operating attachments.

**LARGE-DIAMETER FRONT PIPING
PLUS ELECTRIC COOLING FANS
CONSERVE FUEL BY UP TO 5%**

Now you know

Multi-language LCD monitor and rotary dial provide intuitive access to a wealth of information and functions. Just turn and tap to select work mode, access operating info, check maintenance intervals, source diagnostic codes, adjust cab temperature, and tune the radio.

Take a load off

Quiet and spacious cab features standard rearview camera for expansive all-round visibility. Sculpted mechanical-suspension high-back seat slides together or independent of the joystick console to help keep operators comfortably supported.

Get good grades

Grade-reference-ready option includes sensor mounts to help speed installation, eliminating the need to grind, weld, and repaint. Our “open-architecture” design allows you to employ your favorite brand of grade-control system to help maximize productivity and uptime while lowering daily operating costs.

See your work in a new light

Optional deluxe LED lights at cab front and rear, boom, and toolbox shine when your workday extends beyond daylight. Engine-compartment light makes it easy to see daily maintenance points in low-light conditions.

Add some muscle

When the digging gets tough, simply press the standard power-boost button on the right-hand control for more hydraulic muscle.

FOR MORE MUSCLE**

Simplify your routine

Large fuel tank and 500- and 5,000-hour engine and hydraulic oil-service intervals decrease downtime for routine maintenance. Fluid-level sight gauges are conveniently located and can be checked at a glance.

Precision Construction

This suite of construction technology delivers **Productivity Solutions** to help you get more done, more efficiently.

In-base JDLink™ connectivity provides machine location, utilization data, and alerts to help you maximize productivity and efficiency. To maximize uptime and lower costs, JDLink also enables **John Deere Connected Support™**. Dealers use Expert Alerts based on data from thousands of connected machines to proactively address conditions that may otherwise likely lead to downtime. Your dealer can also monitor machine health and leverage remote diagnostics and programming capability to further diagnose problems and even update machine software without a time-consuming trip to the jobsite.*

Bucket Selection Guide*													

*Contact your John Deere dealer for optimum bucket and attachment selections. These recommendations are for general conditions and average use. Does not include optional equipment such as thumbs or couplers. Larger buckets may be possible when using light materials, for flat and level operations, less compacted materials, and volume loading applications such as mass-excavation applications in ideal conditions. Smaller buckets are recommended for adverse conditions such as off-level applications, rocks, and uneven surfaces. Bucket capacity indicated is SAE heaped.
