TRAINING YOU CAN DEPEND ON

What we offer -

Level 1 GPS

This training is designed for new GPS users, machine operators or for the person who would like to learn good practices for Topcon GPS. Here we will go through the all-new features/benefits of Version 15* of Pocket 3D software as well as Version 15* of 3DMC. This includes job site setup workflow, machine operation tips and basic troubleshooting.

Level 2 GPS

This training is designed for individuals who have utilized Topcon equipment before and are looking to take that next step with the all-new advanced features/benefits in Version 15* of Pocket 3D. This includes as-built collection, data reporting/management, advanced troubleshooting and job creation. Recommended GPS Level 1 as prerequisite.

Topcon Office Training:

This training includes a walk-through of Topcon Office software. Here we will go through importing process, data clean up, what you should be looking for, and some troubleshooting processes.

- Version 15 is upgradeable on almost all existing data collectors

LPS Total Station Training:

This training covers for the site setup procedures of a Topcon robotic total stations or LPS (Local Positioning System) on a construction job site. Training includes robotic total station layout utilizing Pocket 3D software, machine control connectivity and best practices for the system. Designed for all Topcon robotic total station operators.

Certification GPS Class:

This hands-on application class is intended for management to send individuals to receive feedback and take that final step of their GPS understanding. This course will combine all applications and is intended to make you the primary GPS contact within the company. Level 1 and 2 GPS training are required for prerequisites. This is intended for the primary individuals who will be utilizing GPS on site.
