

MULCHING TEETH

TEETH THAT TEAR THROUGH ANYTHING

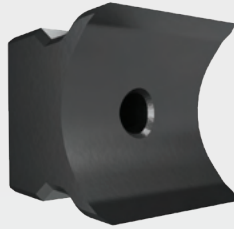

EDGE™
HARDED
STEEL TEETH

Designed with a taller paddle to ingest more material, boosting your productivity like never before. Experience superior suction that pulls in material more efficiently, making your mulching tasks faster and easier. Additionally, the blade features an expanded sharpenable edge, extending service life.

IDEAL FOR

- » Enhanced productivity
- » Tooth holder protection
- » Finer finish

MIX & MATCH ● **DRUM COMPATIBLE**

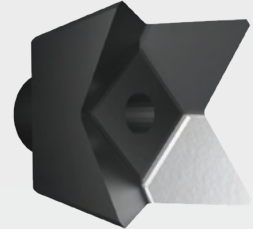

TWIN CHISEL®
PLANER TEETH

The best of both worlds for productivity and easy maintenance. Our design allows you to quickly sharpen the cutting edge to maintain maximum productivity.

IDEAL FOR

- » Intermittent ground contact
- » High-productive environments
- » Softer soils
- » Fine mulch

MIX & MATCH ● **DRUM COMPATIBLE**

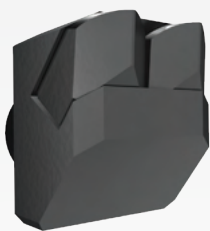

FOUR POINT
HARDED STEEL TEETH

Acts like an axe to slice material for the most productive cut. The more aggressive design allows you to grab and pull in material more effectively.

IDEAL FOR

- » Limited ground contact
- » High-productive environments
- » Softer soils
- » Finer mulch

MIX & MATCH ● **DRUM & DISC COMPATIBLE**

TWIN MAUL®
CARBIDE TEETH

Tooth life 3-to-5 times longer than steel, and require no sharpening. Designed to withstand abrasion and ground contact, our virgin, carbide is the finest available. Ideal for rocky terrain and high fire danger areas.

IDEAL FOR

- » Rocky terrain
- » Rental fleets
- » Fire-danger areas
- » Medium mulch

MIX & MATCH ● **DRUM & DISC COMPATIBLE**

ARMORED MAUL™
CARBIDE TEETH

Heavy-duty construction is designed for those working in tough, rocky terrain. It's increased inertia through every cut, and added material protecting the carbide teeth, helps reinforce the tooth for a longer life.

**CAN NOT BE MIXED & MATCHED
OPEN DRUM (OD) ONLY**

IDEAL FOR

- » Rocky terrain
- » Extreme ground engagement
- » Fire-danger area

● **OPEN DRUM COMPATIBLE ONLY**

WANT TO MIX IT UP?

Some **Diamond Drum** teeth are interchangeable, giving you the flexibility to mix and match while maintaining proper drum balance. This allows you to fine-tune your setup for maximum performance in any application. Tooth configurations can be customized based on environmental conditions and operator preference, ensuring you have the right combination for the job.

Diamond Disc Teeth are also designed with versatility in mind — some teeth are interchangeable, allowing you to adapt your setup and apply different operating techniques for added efficiency and control.

For a list of common drum and disc configurations, visit the Mulching Tooth page or contact your dealer for expert guidance. **Simply scan the QR code on the front of this sheet to explore more!**
