

SKID STEER ATTACHMENTS

Diamond Mowers land management attachments for skid steers.

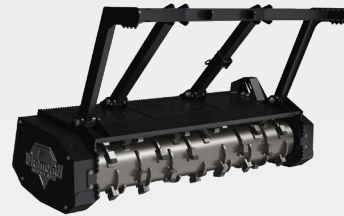

The Drum Mulcher DC Pro is the ideal solution for loaders up to 75 hp. Built with Diamond quality and engineered for landowners, its light weight and intuitive operation inspire confidence among both veteran operators and those new to mulching.

- Available cut width: **50"**
- Mulches up to **8"** diameter brush/trees
- **Low or High flow** hydraulic machines

The Drum Mulcher DC Pro X is ideal for turning brush and trees into a fine mulch for quick decomposition. It is ideal for operating near homes, buildings and roads.

- Available cut widths: **60" | 72"**
- Mulches up to **9"** diameter brush/trees
- **Low or High flow** hydraulic machines

Optimized infeed and bite size produces a smaller end product than conventional Open Drum models while allowing heavy ground contact for maximum productivity.

- Available cut widths: **60" | 72"**
- Mulches up to **9"** diameter brush/trees
- **High flow** hydraulic machines

The DC Pro X2 Drum Mulcher efficiently processes brush and trees into fine mulch for fast decomposition, making it perfect for use near homes, buildings, and roads. Its elevated motor placement enhances stability and balance, delivering improved performance in tough conditions.

- Available cut widths: **60" | 72"**
- Mulches up to **9"** diameter brush/trees
- **Low or High flow** hydraulic machines

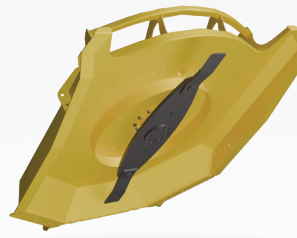

Designed with an optimized infeed and bite size, the OD Pro X2 offers the perfect balance. Its elevated motor design enhances stability and balance, ensuring reliable performance in challenging environments.

- Available cut widths: **60" | 72"**
- Mulches up to **9"** diameter brush/trees
- **High flow** hydraulic machines

Turn your stand on skid steer into a multipurpose land management machine with the new Mini Brush Cutter Pro X from Diamond Mowers, featuring the performance of our industry-leading Brush Cutter Pro X in a streamlined profile.

- Available cut widths: **42"**
- Cuts up to **5"** diameter brush/trees
- **Low flow** hydraulic machines

Ideally suited for maintaining farmland, ranches and recreational property, the Brush Cutter Pro delivers the same premium cutting performance and versatility as the Pro X in a lighter-weight model engineered specifically for medium-duty use and applications.

- Available cut width: **72"**
- Cuts up to **5"** diameter brush/trees
- **Low or High flow** hydraulic machines

Whether you are facing overgrowth, or the need to make land more valuable, this versatile, high-performance attachment excels at thoroughly processing vegetation, such as thick grass and brush, and can effectively cut material up to 10" in diameter trees.

- Available cut widths: **60" | 72" | 84"**
- Cuts up to **10"** diameter brush/trees
- **Low or High flow** hydraulic machines

Grind down trees and brush efficiently with the disc mulcher. With the ability to mulch trees up to 6", this mulcher is ideal for rural environments and saves tremendous amounts of time over manual labor. Three motor options available: Gear, P125 & P160.

- Available cut widths: **48" | 60"**
- Cuts up to **14"** diameter brush/trees
- **Low** or **High flow** hydraulic machines

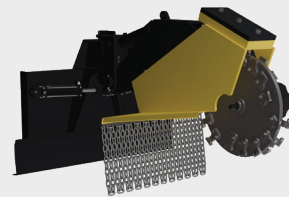

Setting a new standard for power and production, and designed specifically for the most demanding customers, the Belt Drive Disc Mulcher is the top-performing Disc Mulcher on the market. Its patent-pending drive system cuts spool-up and recovery times by up to 50%, and the industry-exclusive bolt-in liner make this the most powerful and most durable Disc Mulcher on the market.

- Available cut widths: **60"**
- Cuts up to **14"** diameter brush/trees
- **High flow** hydraulic machines

Simple and easy to operate, this stump grinder features cutting teeth on both sides to effectively grind down tree stumps. This attachment has a responsive suspension system to prevent overloading.

- Available cutting widths: **24" | 26"**
- Grinds **any size stump** below ground level
- **Low** or **High flow** hydraulic machines

With the same power of a self-contained commercial unit at a fraction of the cost, our stump grinder features six-way wheel positioning to effectively remove a stump without repositioning your skid steer.

- Available cutting widths: **26"**
- Grinds **any size stump** below ground level
- **High flow** hydraulic machines

This hydraulic oil cooler allows you to run longer for decreased downtime and increased production on hot days. It features loader-specific mounting, automatic reversing fans and a removable screen for easy cleaning.

*Fan assemblies are black, shown in gray for better visibility.

- Heat Rejection: **140,000 BTU/HR**
- Two temperature activated 12" fans
- **No drilling** or **welding** necessary

Eliminate hydraulic coupler damage and decrease downtime. This hand-threaded connection features larger couplers for decreased restriction, which also reduces oil temperatures and increases pressure to the attachment for increased performance.

- Eliminates **brinelling**
- Reduced restriction, **less heat**
- **Can connect** under pressure

Stay safe with this 1/2" polycarbonate replacement front door. This loader-specific and contoured front door replaces your glass door, and re-uses the existing hardware to keep costs down while protecting the operator.

- **Shatter resistant** enclosure
- **Scratch** and **fog resistant** coating
- **Stronger** than acrylic and glass

The Stand-On Skid Steer Polycarbonate guard offers quick installation and protects operators from debris and hazards while allowing full loader arm movement.

- **Shields operators** from debris and hazards
- **Quick installation** and removal with a friction-mount design
- Fits most stand-on skid steer models

***MINIMUM 1/2" THICK POLYCARBONATE OPERATOR PROTECTION REQUIRED. SOME APPLICATIONS MAY REQUIRE ADDITIONAL PROTECTION.**
